Automate HR Processes

HUMANIZE YOUR HR DEPARTMENT.

HR managers lose
14 hours a week
performing tasks that
could be automated

Manual processes
decrease HR
productivity by **41%**

McKinsey estimates
that **56%** of HR tasks
can be automated

Your Human Resources (HR) staff spends countless hours dealing with data-heavy tasks and processes related to employee onboarding, payroll, training, and employee relations. However, many of these tasks are repetitive and rules-based and are ideal candidates for automation, freeing up HR staff to focus on the people that matter.

HR staff forms the foundation on which the rest of your staff is built. They are responsible for managing every aspect of the employee journey, from onboarding to the end of employment, much of which involves tedious tasks that take hours to complete.

With such high demand on their time, this leaves little room for HR professionals to truly connect with the human resources your company relies on. Digital workers can take over many of the repetitive, data-centric tasks HR staff perform, leaving them to focus on connecting with employees, nurturing relationships and helping resolve issues.

THE DIGITAL WORKER TRANSFORMATION

Digital workers are software robots that use artificial intelligence (AI) and machine learning to perform repetitive, rules-based tasks that take a lot of time and are prone to error when done manually

These digital workers are not meant to replace human workers. Instead, they seamlessly work alongside them to streamline operations and allow humans to focus on high-value tasks.

At Ampliforce, we have a team of experts ready to work with you to create a digital worker solution that is customized to meet your company's unique needs. This is a complete end-to-end automation solution that does not require third-party integrations and only takes a few days or weeks to develop.

And because we want the process of automation to go smoothly, we will work closely with you to ensure you understand how your solution works.

TASKS DIGITAL WORKERS CAN PERFORM FOR HR

Pull key information from a variety of documents

Compare candidate applications with job requirements

Create employee IDs and user accounts

Perform data cleansing

Collect, integrate and sync data from multiple systems

Extract unstructured data from a variety of sources

Verify information and track attendance

Explore The Transformative Power Of Ampliforce Digital Workers

Reach out to a member of our experienced team and learn how we can help you automate your HR processes for maximum efficiency.

Why Use Digital Workers for HR

STREAMLINED HIRING

Digital workers can manage the intake of applications, compare them to job requirements, shortlist candidates to be interviewed and send out notification to those candidates.

SIMPLIFIED ONBOARDING

From activating a new employee account and assigning employee IDs to determining the credentials to be assigned and managing paperwork, digital workers make onboarding easy.

EASY PAYROLL PROCESSING

Save your staff from the tedium of the repetitive tasks associated with payroll by having digital workers verify employee hours, integrate data from multiple systems and generate reports.

ENHANCED DATA MANAGEMENT

Digital workers can manage all data related to new hires, existing employees, contractors and more, keeping systems up-to-date and generating documents required by employees.

SMOOTH OFFBOARDING

Handle employee exits with ease as digital workers generate the relevant exit documents, revoke system access and finalize the settlement for departing employees.

IMPROVED COMPLIANCE

With strict and ever-changing labor and privacy laws and regulations, digital workers can stay on top of the most recent changes and ensure HR processes are fully compliant and error-free.
